PATIENT:
TERESA WHITE

## FOLLOW-UP OF THE PATIENT TERESA WHITE

19-year-old girl who was working as a waitress in the pub "El sobaco Cantador".

During the observation of the patient I saw the girl could move 2 crystal glasses with her mind. That's when I introduced myself and offered to teach her to control her powers.

Here starts her follow-up

Professor Rabadilla.

## INSTRUCTORS

### PROFESSOR RABADILLA

The initial tests consist of carrying an object (glass cup) to the tray held by Professor Rabadilla myself)

### PROFESSOR PERE ZOSO

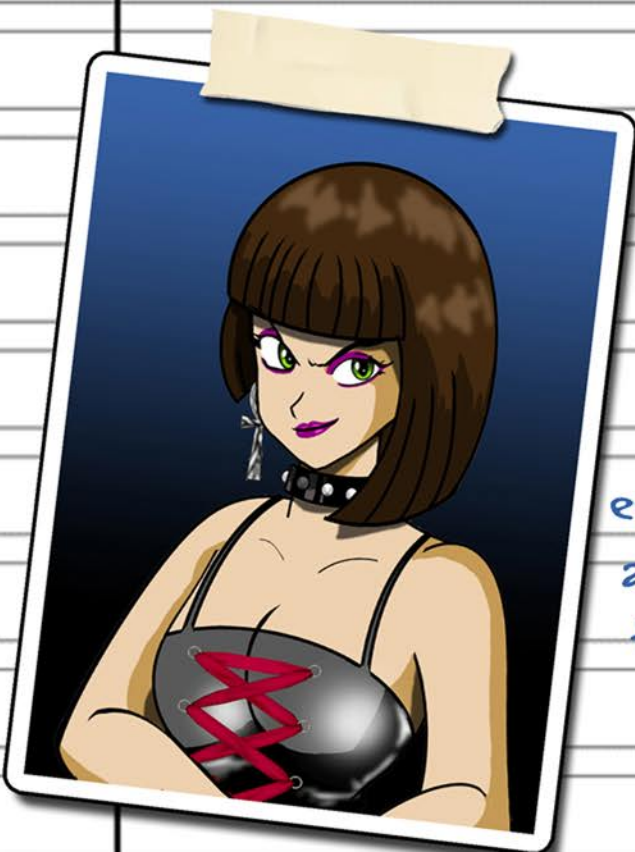

This next batch of tests is run by my colleague Pere. It is somewhat more complete. She has to catch the golf balls scattered around the room with a bowl.

### WITCH WICCA

### GOTICA DAGUA

With this instructor we will treat paranormal energies. She has to arrive at the witch's flame with the box and then catch the spiders.

When the young woman finishes the tests of all three instructors, she will have to pass the last one, which has not been determined yet...

## CONTROLS

Use the **SPACE** key, or the joystick / pad **FIRE** button to make the objects levitate.

Use the **LEFT** and **RIGHT** cursor keys or the corresponding direction of the joystick / pad to move the objects.

The object we are trying to control will begin to descend if we do not press the levitate key,

Press **N** to pause the game.

## HINT

Try to control the levitation key. Sometimes you will have to press it repeatedly to create up and down paths for a long stretch. As soon as you know how to control this technique, everything will be easier.

- And above all .... **BE VERY PATIENT !!**
