

Golvellius' Roar

The original Golvellius 2 game was supplied with a so-called 'special box'. Inside this special box, the Resource Collection could be found, along with two small gadgets.

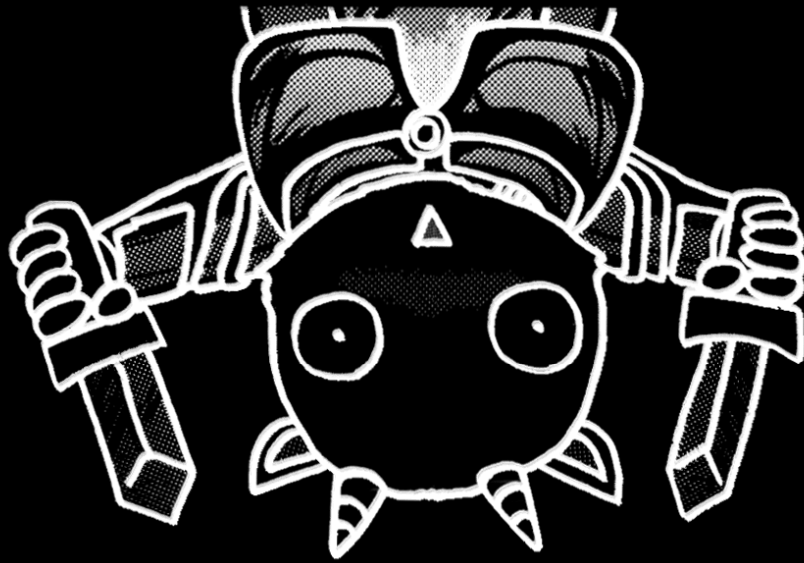

One of these was the 'Scream of Princess Reena', a small piece of cloth which had to be torn apart in order to produce a noise that would sound like the scream of Princess Reena. As it is not possible to supply you with this virtually, you will not find the 'Scream of Princess Reena' in the WOOMB re-release.

The other gadget was this 'Golvellius' Roar'. Information on how to build and use it can be found on the last page of the Resource Collection that is supplied with the WOOMB re-release.

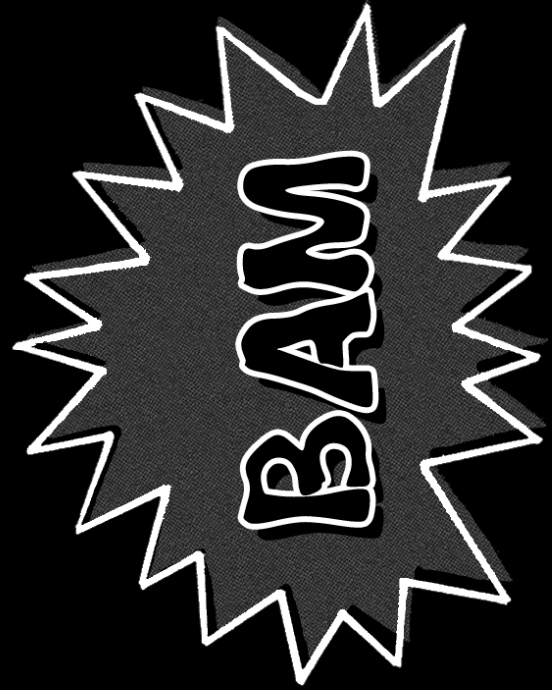

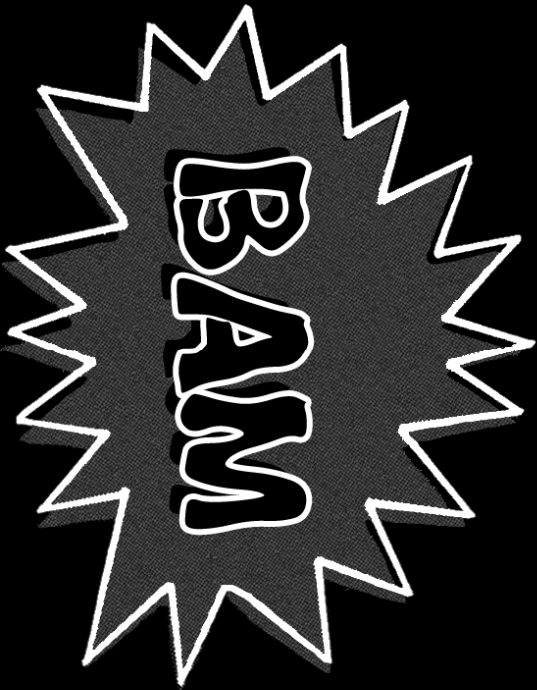

Print this on smooth paper (the type that's similar to sulfurized baking paper), follow the building instructions and have fun!
